new textbooks at all levels of chemistry appear with great regularity some fields like basic
biochemistry organic reaction mechanisms and chemical thermodynamics are well
represented by many excellent texts and new or revised editions are published
sufficiently often to keep up with progress in research however some areas of chemistry
especially many of those taught at the graduate level suffer from a real lack of up to date
textbooks the most serious needs occur in fields that are rapidly changing textbooks in
these subjects usually have to be written by scientists actually involved in the research
which is advancing the field it is not often easy to persuade such individuals to set time
aside to help spread the knowledge they have accumulated our goal in this series is to
pinpoint areas of chemistry where recent progress has outpaced what is covered in any
available textbooks and then seek out and persuade experts in these fields to produce
relatively concise but instructive introductions to their fields these should serve the needs
of one semester or one quarter graduate courses in chemistry and biochemistry in some
cases the availability of texts in active research areas should help stimulate the creation of
new courses new york new york charles r cantor preface this book is not a traditional
quantum chemistry textbook instead it represents a concept that has evolved from
teaching graduate courses in quantum chemistry over a number of years and
encountering students with diverse backgrounds

the contents of the book are comprehensive and cover the whole spectrum of guidance as
an emerging discipline within the larger field of education in the country the language
and style of the book are simple references and assignments have been provided at the end
of each chapter to help students in preparing for examinations examples and illustrations

have been given from the day to day life of students the book has been especially designed to cater to the needs of b ed m ed m a and m phil students who offer educational and vocational guidance as a paper it will also prove useful for teachers administrators and parents in providing necessary information on guidance and counselling

in the field of administrative law there is no systematic body of rules similar to those characteristic of european civil codes general principles are therefore of fundamental importance this volume the sixth in the series concerning the common core of european administrative laws explores this importance through two strands firstly it examines in detail the relationship between general principles of law such as due process and sector specific rules established by legislative and regulatory provisions for example in licensing and disciplinary matters several questions about the nature of general principles emerge through this analysis are general principles about filling gaps or do they have a foundational role because they give meaning to the values that are shared by european legal systems such as respect for the rule of law and for fundamental rights secondly this volume also explores the interaction between commonality and diversity in european administrative law it considers whether there are shared standards of administrative conduct including the duty to give reasons or if there are fundamental differences with regard to non european legal systems such as that of china and venezuela these questions are investigated through factual analysis based on a set of hypothetical cases which are discussed by national experts this book then scrutinizes these questions to determine how commonality and diversity have extended and interact with one another within and across legal systems both diachronically and synchronically over the course of a century it shows that there are both unexpected areas of agreement between the european legal systems notably concerning the right to be heard expressed by the maxim audi alteram partem and the duty to give reasons and there are also areas of disagreement for example as far as the right to remain silent vis à vis the administration that is nemo tenetur se detegere is concerned

a valuable resource for students preparing for certification registered accountants and auditors and financial personnel in various businesses this is the 9th updated edition of a classic auditing text integrating theory with practice and application it is up to date with the field s recent and gradual transition from self regulation to external auditing and supervision

over the past decade the field of chemical engineering has broadened significantly encompassing a wide range of subjects however the basic underlying principles have remained the same to help readers keep pace this volume continues to offer a comprehensive introduction to the principles and techniques used in the field of chemical petroleum and environmental engineering as in previous editions author david m himmelblau strives to help readers learn to develop systematic problem solving skills understand what material balance are comprehend energy balances and cope with the complexity of big problems in addition readers are exposed to background information on units and measurements of physical properties basic laws about the behavior of gas liquids and solids and basic mathematical tools

article 38 of the statute of the international court of justice defines international law to include not only custom and convention between states but also the general principles of law recognized by civilized nations within their municipal legal systems in 1953 bin cheng wrote his seminal book on general principles identifying core legal principles common to various domestic legal systems across the globe this monograph summarizes and analyzes the general principles of law and norms of international due process with a particular focus on developments since cheng s writing the aim is to collect and distill these principles and norms in a single volume as a practical resource for international law jurists advocates and scholars the information contained in this book holds considerable importance given the growth of inter state intercourse resulting in the increased use of general principles over the past 60 years general principles can serve as rules of decision whether in interpreting a treaty or contract determining causation or ascertaining unjust enrichment they also include a core set of procedural requirements that should be followed in any adjudicative system such as the right to impartiality and the prohibition on fraud although the general principles are by definition basic and even rudimentary they hold vital importance for the rule of law in international relations they are meant not to define a rule of law but rather the rule of law

in recent years there has been a noticeable increase in references by investor state arbitral tribunals to general principles of law as a source of law however these references have rarely been accompanied by detailed explanation this book aims to provide the actors involved in investor state arbitration with a set of comprehensive guidelines to better understand the nature meaning and function of general principles of law in the field of international investment law applying these principles to practice the book assesses

seventeen concepts and notions in the field of investment arbitration to provide counsel and arbitrators with clear guidance on what should and should not be considered a general principle of law
